SURVEY ON LABOURS

Today me and my friends went to field survey to know about the people who are working has a labours. We went to one place where a man was selling his exported sofa sets on footpath near I.B road. This old man came from Nellore to raichur with his family to sell the furniture. The reason behind coming to raichur is, there is No place, and customers who will purchase their furniture. At present He is staying on the street near I.b road under the tent made up of bamboos and he paid RS. 80,000 for that small acre of plot to sell his furnitures and also the owner of that place charged RS. 20,000 and gave current connection only for two days. This man is struggling Day & Night for his Family. He is just earning approximately RS. 20,000 for a man by selling these sofa sets. Because for one day if the customer will buy so that he will get something benefit otherwise for one week he will sell minimum one furniture. Bu still also the customer comes to them and starts bargaining for lesser price. Sometimes he sells furniture for the price demanded by the customers orelse the same price he had brought from Nellore. The furnitures are also readymade from transportation. He pays approximately RS. 1000 for the person who transports the goods from Nellore to Raichur safely to the place where they are staying now. Now his wife also helping him in his work and his son named Ramesh who studies till 9th std in Nellore left his studies due to lockdown at Nellore and came here with his parents to help them in their work. They had Aadhar Card, Ration Card, KEB bill and other all documents which are are of no use in their help. He is struggling day by day to feed his family. If he gets any benefits then he can live happily with his family for few days.

A Report on Industrial Visit to Hutti Gold Mines Company Limited

➤ About

Taranath Shikshana Samsthe's Bankatlal Rajaram Boob College of Commerce had organized an industrial visit on 08th June 2022 to the Hutti Gold Mines Company Limited located in Hutti, 79 Kms from Raichur via Sirwar, Karnataka for the students of M.Com first and second year. The visit was organized with prior permission of Honorable President of Taranath Shikshana Samthe, Sri. Parasmal Sukhani Sir and the Secretary, Managing Committee, Bankatlal Rajaram Boob College of Commerce, Sri. CA Chethan Boob sir. Dr. Sheelakumari Das Madam, Principal, BRB College of Commerce, Raichur, initiated the industrial visit and lent her helping hand for getting the permission and acted as a bridge between the staff, students and the Management. Asst Prof. Sandeep Karabhari and myself were coordinators for this whole industrial visit. Six other faculty members accompanied the visit.

➤ Why Industrial Visit?

Industrial visit provides the students with an opportunity to learn practically through interaction, working methods and employment practices. It gives the students an exposure to current work practices as opposed to theoretical knowledge being taught in their classrooms.

➤ Highlights of Industry Profile

Hutti Gold Mines Company Limited (HGML), Government of Karnataka Undertaking (Established in 1947 as Hyderabad Gold Mines), has the unique distinction of being the only producer of primary gold in the country. HGML has been active in the exploration, development and exploitation of gold deposits occurring in Karnataka. The Company's Corporate Office is situated in Bangalore and it operates two units-The Hutti Gold unit (HGU) ,in Raichur district and the Chitradurga Gold Unit (CGU) in Chitradurga district with an operating mine at Ajjanahalli (Tumkur District) .HGU is a fully integrated unit with a capacity to produce 5,50,000 tonnes per annum.

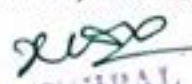

This mine is probably one of the most ancient metal mines in the world, dating to the Pre-Ashokan period, the ancient miners having worked down to a depth of over 2300 feet. It is probable they had broken the rock by "fire-setting" i.e. heating it by means of fires and suddenly cooling it by pouring water onto the heated rock causing pieces to break off.

In addition to the ancient mining mentioned above, there was further mining in the area between 1890 and 1920 when the price of gold was about Rs. 18 for 10 grams (Rs 20.97 per tola). The biggest of these ventures was at Hutti where, from 1902 to 1919, nearly 7,400 kg of gold were obtained from very rich ore, at an average yield of 19 g/metric tonne. Most of this ore came from the main mine, which reached a depth of about 1,100 m below surface. The industry closed down in 1920 due to technical difficulties and lack of funds.

In 1937, the Nizam's Government decided to prospect the area again with a view to possible re-opening of the mines (the only industry in the area apart from agriculture) so as to provide employment. The area

was a backward district, which was considered at that time to be a more or less perpetual famine area. In 1940, after some satisfactory exploratory work, it was decided to install a plant to treat 100 metric tons of mine ore per day, but before the plant could be obtained, operations were suspended, and from 1942 to 1946, due to World War II, the mine was shut down except for pumping. After the end of the war, the scheme was resumed and production started in September 1948, at the rate of 130 tonnes of ore per day. By 1972 this rate had progressively increased to 600 tonnes of ore per day.

➤ **Details of the Industrial Visit**

The staff and students assembled at the college campus by 7:30 AM and left Raichur by 9:00 AM after taking attendance and giving due instructions to the staff and students by the principal. After reaching the industry at 11:35 AM and after due procedures we were allowed into the premises where we interacted with the employees. We were accompanied by a security officer into the premises. The employees responded in a good manner and gave insights about the working of each division of the industry. The premise of the industry was surrounded by greenery thus promoting sustainability and environment protection. It was learnt from one of the employee that 100 tonnes of mine gives an output of 4 grams of gold. The plants of mine segregation area, mine balls formation, water treatment and disposing of waste are shown to us.

Our Industrial visit was permitted only to the surface area. When asked for the reason, one of the employees conveyed us that avoiding accidents was the main attention behind restricting to surface area. We were taken to the iron shaft, metal exploration department, crushing section, carbon in pulp process department, electro winning, electro refinery etc. By 1:30 PM we along with students have reached the canteen area following which we had lunch by 3:00 PM.

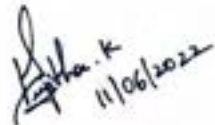

As the KSRTC bus was about to pick us up at 6:00 PM, we have explored some of the other places in Hutti like the shiva temple and reached bus stand by 5:30 PM. While travelling to and from Hutti, the students were very enthusiastic. We left Hutti bus stand by 6:05 PM and reached BRB College Campus, Raichur by 8:20 PM.

➤ **Overall Experience**

The students and faculty felt very happy and satisfied with the overall learning and experience from their industrial visit. We are grateful for the college for providing us with such an amazing opportunity to explore the practical things in the industry apart from the classroom learning.

Summary of Practical Knowledge Gained

1) Extraction of Gold from Ore

The extraction of Gold from ore involves Mining, Mineral Processing, Hydro, Electro and Pyro metallurgical processes.

Various Sections/ Departments of Company

Mining: Gold ore collected by mining from locations Hutti, Uti and Hera-Budhdhinni. During FY year total 638540 MT of ore had been mining and subjected to Gold Extraction. **Crushing Section:** Used to Reduce the Lump Ore Size of 300 to 1500 mm reduced to 5 to 10 mm **Grinding Section:** 100 TPH SAG and Ball Mill Plant Used to Reduce particle size to make fine particles. 5 to 10 mm particle size will be reduced to 0.3 mm to less than 100 microns. **Leaching:** finely grinded mineral ore is subjected to Cyanide Leaching Process which is used in order to dissolve the Gold in cyanide solution and leave impurities **Carbon in Pulp process (CIP):** Activated carbon used in order to absorb the dissolved gold on to carbon. Then Caustic Cyanide solution, water is used for stripping of gold from carbon. **Electro winning:** In this process, the solution carried gold will be deposited on to the Cathodes. Cathodes are then rinsed and dried thus gold flux will be collected and subjected to smelting and poured into the molds to obtain Bullion Buttons/ Bars **Electro Refinery:** it is the process used to obtain pure gold by the electrolysis.

Highlights of HGML

- India's Leading Gold Producer
- HGML per day gold production is 8 to 10 kgs
- HGML is completely Government undertaken
- Uti, Hira-Buddinni & Hutti are active mining fields for obtaining gold ore
- Each Bullion Bars are of 5 to 11 kgs, 88-91 % of Gold, 8-11% of Silver and Balance Impurity.

Topic: Role of women in freedom struggle

"The more you sweat in peace the less you bleed in war"

- vijaylakshmi pandit

Introduction: As the topic stated above, the Role of women in freedom struggle. The contributions made by women in the freedom is unimaginable. The 'women Empowerment' concept has played a vital role in developing, encouraging and uplifting to take social and political decisions like men. Many freedom fighters with their bravery and skills strained hard to defeat the enemies in the war.

India got its Independence on 15th August 1947, but nearly britishers ruled nearly 200 hundred and looted enormous wealth. But the inspiration, dedication, commitment and self-confidence of the women freedom fighters was at a great extent.

The 'Rani of Kittur' Kittur Rani chennamma (1829-1958) was a brave warrior of the battlefield she with her son on her cavalry charge fought with Tatya tope in 1852 at Gwalior and later on Sangoli Rayanna continued the work.

Sarojini Naidu 'The Nightingale of India' and has been considered as the heroine of the 20th Century. She was the first women governor general of Independent India. She has written many poems through these poems she wants to give a message

about the cultural and richness of India. She was the president of Indian National Congress and participated with Gandhi's Non cooperation movement and ^{and} Disobedience movement and also appeared in 2nd round table conference with Gandhi.

Capital Lakshmi Sahgal (1900-1990) was a professional doctor who had worked with Rani of Jhansi in the Regiment of 1858 and used to look after the effected victims in the war.

Annie Besant was an Irish lady and also participated in the freedom struggle. She started the Home Rule Movement in 1916 and was the founder of Theosophical Society.

Conclusion: As India is following 'Unity in diversity' we all citizens cannot pay the sacrifice made by the real heroes of the Freedom struggle.
